

Setting up multi-factor authentication (MFA) using GCU MFA via the invitation email

The University is upgrading our MFA to a new platform, GCU MFA, for a much-improved defence against cyber threats.

All staff with systems access must register on the GCU MFA system by Friday, August 23, and either download the app to a smartphone or set up SMS text verification.

New members of staff will need to register for both PingID and GCU MFA. [Follow the instructions for PingID here.](#)

How to register for GCU MFA via the invitation email

You will receive the following email from GCU MFA in your University mailbox inviting you to register with the platform:

Welcome to GCU MFA!

As you will be aware from recent University communications, we are upgrading our MFA to improve our Cyber Security. Please use the link below to register.

Access the User Portal
with your existing University login credentials.

[Login Now](#)

Here are your account details:

Username: cte5@gcu.ac.uk

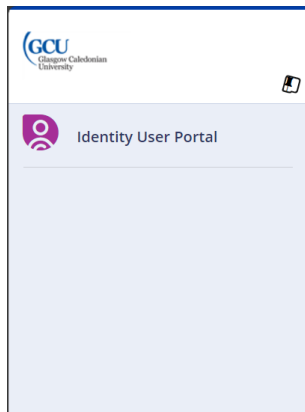

Further information can be found in our FAQs. If you require assistance please contact [IT Help Portal](#) or via email ithelp@gcu.ac.uk

Thank you for your co-operation

Information Services

:

- Click on 'Login Now' and use the username outlined in the email
- Insert your University email password and follow the instructions on the screen to help you verify your account
 - If you select email verification, a one-time passcode (OTP) consisting of eight digits will be sent to your mailbox
 - If you select SMS verification, the OTP will be sent to you via a text message from CyberArk
- Once your account has been verified, click on 'Go to User Portal' then click on 'Get Started' in the subsequent pop up (see images below)

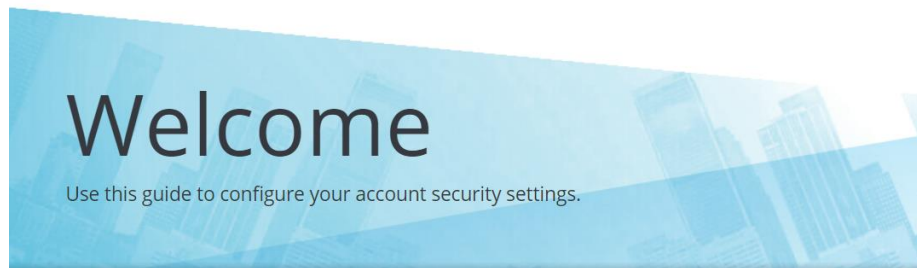

Let's start working!

Open the service picker to see available services

The User Portal enables the following:

- Access your web apps with Single Sign-On (SSO)
- Store your business passwords
- View your user activities

[Get Started](#)

You will then need to set up at least one of the three mechanisms for MFA with your account:

1. SMS text message
2. Third party authenticator app
3. Mobile device

1. SMS text message

- Click on 'Test message' on the left-hand side menu
- Your mobile number may be pre-populated based on the information the University has on our directory.
- Click on 'Done' if your mobile number is pre-populated and is correct
- Change/add your mobile number if it is incorrect or blank. Please you start your number with the country code i.e. +44. Then click on "Save" then "Done" when complete.

2. Third party authenticator app (e.g. Microsoft Authenticator App)

Authentication Setup

Welcome to the User Portal. Before we get started, please set up 1 or more mechanisms for Multi-factor Authentication. Multi-factor Authentication may be required when you sign in to the user portal or an application from the user portal.

1. Install your 3rd party authenticator app.
2. Launch your authenticator app and tap the "+" icon or the "Add Account" button to add a new account.
3. Select "Scan Barcode" or "Scan QR Code" and use your phone's camera to scan this code:
4. Once you have scanned the code, enter the 6-digit verification code generated by the authenticator app and click verify.

Code

0 of 1 required mechanisms configured

- Click on 'Third party authenticator app' on the left-hand side menu
- Install your third party authenticator app
- Launch your authenticator app and tap the '+' icon or 'Add account' button to add a new account
- Select 'Scan barcode' or 'Scan QR code' and use your phone's camera to scan the QR code on the screen
- Once you have scanned the code, enter the six-digit verification code generated by the authenticator app and click 'Verify'

3. Mobile device (i.e. CyberArk app)

CYBERARK

Authentication Setup

Welcome to the User Portal. Before we get started, please set up 1 or more mechanisms for Multi-factor Authentication. Multi-factor Authentication may be required when you sign in to the user portal or an application from the user portal.
