# Undergraduate Programme Specification BA (Hons) Finance, Investment and Risk

This specification provides a summary of the main features of the programme and learning outcomes that a student might reasonably be expected to achieve and demonstrate where full advantage is taken of all learning opportunities offered. Further details on the learning, teaching and assessment approach for the programme and modules can be accessed on the University website and Virtual Learning Environment, GCU Learn. All programmes of the University are subject to the University's <u>Quality Assurance</u> processes.

GENERAL INFORMATION									
Programme Title	BA (Honou	BA (Honours) Finance, Investment and Risk							
Final Award	Bachelor of	Arts with Honours in	Financ	e, Investment and Risk					
Awarding Body	Glasgow Ca	aledonian University							
School	Glasgow Sc	Glasgow School for Business and Society							
Department	Finance, Ac	Finance, Accounting and Risk							
Mode of Study	Full-time								
	Part-Time /	Distance Learning sul	bject to	o availability					
Location of Delivery	Glasgow								
	Other camp	ouses subject to availa	bility						
UCAS Code	N390								
Accreditations (PSRB)	None								
Period of Approval	From:	September 2024	To:	August 2029					

#### EDUCATIONAL AIMS OF PROGRAMME

#### **Context and purpose**

The programme is a distinctive and specialist programme, preparing students for careers in an important global sector - the financial services industry. It provides a contemporary, skillsbased curriculum that is designed to be attractive to home and international students. Using a range of industry-appropriate technology and harnessing the expertise and co-operation of employers and professional bodies, it cultivates the knowledge-base, critical-thinking, and personal development and leadership attributes of its students to enable them to succeed in their careers. In so doing, it aims to support and enhance the reputation of GSBS as a centre of expertise in financial services. Its content and delivery acknowledges the social mission of GCU, and the importance of sustainability, employability and internationalisation to the aims of GSBS for its student population. The programme is underpinned by the increasing research profile of staff on the programme, the research output of whom is integrated into the curriculum.

Any financial services industry-related degree should be designed to provide graduates with a thorough grounding in key skills and knowledge prevalent in the financial services sector. At the same time, the programme encourages students to become independent, innovative, confident and resilient thinkers, able to take a global and holistic view of financial services and become responsible industry leaders cognisant of the importance of the financial services sector in supporting the UN's Sustainable Development Goals.

These efforts are supported by staff are members of, and/or have links with, a number of different financial services professional bodies, as well as being Fellows or Senior Fellows of Active HE. Staff also cultivate links with a range of financial services organisations who support

the programme in achieving its objectives, and staff also use these links to help support students' own independent initiatives, such as the Risk and Finance Society.

The result is a programme that challenges students personally and academically, creating graduates with a broad and comparative understanding of theory and practices relevant to the financial services industry, able to exhibit a range of academic, entrepreneurial and social skills that will equip them to be lifelong learners and citizens able to contribute to the common good.

#### **Thematic structure**

Whilst the programme covers the broad scope of the financial services sector, it has sought to develop coherence around four specific themes: Personal Finance; Corporate Finance and Investment; Banking, Technology and International finance; and Sustainability and Risk. Option choices at Levels 3 and 4 include modules designed to supplement or develop these themes. The themes, and the expertise that underpins them, have developed organically within the group, and enable the delivery of a programme which coherently addresses key areas of financial services, but which is also sufficiently flexible to adapt to new developments in the sector.

<u>Personal Finance</u>: At Level 1, Financial Markets Environment and Regulation of Financial Services build a foundation for understanding the operation and regulation of personal finance issues. At Level 2, the Personal Investment module covers key personal finance issues in terms of products, providers and consumers. The Bank Management and Financial Technology modules also look at aspects of the retail market. At Level 3, the Financial Capability, Skills and Employability module specifically deals with retail financial services, although students will also have options in pensions and mortgages to pursue interest in this area further. At Level 4 optional Pensions and Behavioural Finance modules will be available to students. The Dissertation can also be used to enhance learning in this theme.

<u>Corporate Finance and Investment:</u> At Level 1, Financial Markets Environment and Fundamentals of Financial Management for Decision Makers combine to build a foundation for tackling this theme in more detail in the rest of the programme. At Level 2-4, Fundamentals of Corporate Finance, Corporate Finance and Financial Strategies, Sustainable Finance, and Investment Management Theory provide the spine to this theme. Elements in other core modules, such as Banking and Managing Risk in Financial Institutions also support this theme. The Dissertation can also be used to enhance learning in this theme.

<u>Banking, Technology and International Finance:</u> At Level 1, Financial Markets Environment, and Global Challenges for Business and Society build a foundation for tackling this theme in more detail in the rest of the programme. At Level 2, the Banking in a Global Context and Financial Technology modules support this theme. This theme is further developed at Level 3 as the Sustainable Finance and Corporate Finance and Financial Strategies modules provide an international perspective. International Finance, Institutions and Trade deals with this theme at Level 4, whilst Investment Management Theory and Managing Risk in Financial Institutions and the Level 4 Global Pensions module also include an international perspective on the issues they cover. The Dissertation can be used to enhance learning in this theme.

<u>Risk and Sustainable Finance:</u> At Level 1, Global Challenges for Business and Society focuses upon the sustainability element of this theme, whilst the broad issues of risk and technology are raised in other modules at Level 1. At Level 2, the focus is on Financial Technology, although again issues of sustainability and risk are touched on in other modules, such as Personal Finance and Bank Management in a Global Context. At Level 3, The Risk Modelling and Principles of Insurance modules specifically address risk issues, whilst the Sustainable Finance module deals with this element of the theme. The optional module, Data Analytics, considers the uses of technology, and the optional regulation module looks at (risk) regulation. At Level 4, Managing Risk in Financial Institutions analyses key risks to which financial institutions are exposed and the Dissertation can be used to enhance learning in this theme. Options at Level 3 and 4 also enable students to follow risk options on our sister BA (Hons) Risk Management programme as well as modules which enhance students' expertise on sustainability and its management.

### Other modules and options:

<u>Compulsory Modules</u>: Other compulsory modules on the programme support student learning by providing a foundation in economics to underpin financial modules; developing quantitative data skills that can be used and developed through the programme; creating a basis for understanding ethical and responsible leadership behaviours that can be developed and enhanced in the course of learning; providing an opportunity to focus on skills development and their importance for employability in financial services; and to encourage research and critical analysis.

<u>Optional modules</u>: These allow students to develop their interests in programme themes as well as associated areas of study such as economics and data analysis. Options such as the Citizenship/Placement module provide opportunities for students to enhance their perspective as active, confident and more social and globally aware citizens (see programme objectives below).

Exchange and 60 credit Placement opportunities: These opportunities are also designed to enhance students' capabilities as active, confident and more social and globally aware citizens. Continuing students may undertake exchange with an overseas partner institution in one or both Trimesters of Level 3, subject to them undertaking appropriate substitute modules. They may also undertake an assessed placement via the Professional Practice 2 module in place of their second Trimester of study in Level 3, subject to approval of the appropriateness of the placement. Given the logistics and preparation involved, direct entrants are unable to undertake exchange but may be able to undertake a placement.

## Aims of programme

In pursuance of these purposes, the programme seeks to achieve a number of aims. The development of these aims has been informed by, amongst other things, the QAA's Subject Benchmark Statement - Finance (October, 2019)<sup>1</sup>, the Scottish Credit and Qualifications Framework and developments in the financial services sector, including input from industry professionals. The programme seeks to:

- Provide graduates with the knowledge and skills appropriate for a career in the broad area of financial services or in related areas;
- Develop students' competence in, and provide a comprehensive grounding in, core areas of financial services, and in particular in the fields of personal finance; corporate finance and investment; banking, technology and international finance; and sustainability and risk as they relate to the financial services industry;
- Stimulate an enquiring, analytic and creative approach to financial services issues, and to encourage independent judgement and critical self-awareness;
- Develop the capacity to analyse complex unstructured problems and present reasoned conclusions based on evidence, including the use of ICT;

<sup>&</sup>lt;sup>1</sup> <u>https://www.qaa.ac.uk/docs/qaa/subject-benchmark-statements/subject-benchmark-statement-finance.pdf</u>

- Cultivate the ability to organise and plan work both autonomously and as part of a team and to communicate both quantitative and qualitative information effectively; and
- Provide education that supports students in pursuing accreditation by professional financial services bodies in the UK.

To help ensure that progressive development of these knowledge, skills and competencies takes place, objectives have been identified for each level of the programme. These are set out below, preceded in each case by a short summary of the developmental ethos of each level of study, are set out in a Statement of Delivery below. This Statement illustrates how the objectives for each level of the programme will be achieved through delivery of the learning outcomes A1 – E6 set out in this Specification.

#### Statement of Delivery of programme objectives Level 1 – Awareness and Foundation

Students are introduced to the breadth of the financial services sector, its economic importance, and its significance in a wider social context, taking account of the importance of the UN SDGs and the University's Common Good mission. This is supported by underpinning learning in economics, financial management and data management and analysis, as well as introducing skills in using the Bloomberg Lab. A framework of co-curricular and extra-curricular activity will include an introduction to professional bodies, offering professional body student membership and encouraging participation in the student-run Risk and Finance Society. Alongside employer/industry involvement and interaction in modules, the aim is to encourage students to begin to develop their personal goals and aspirations as socially responsible citizens as they develop an awareness of the importance and global significance of financial services.

The objective is to provide students with:

- Outline knowledge of the scope and main areas of financial services and its links with related subjects;
- A more extensive knowledge of some of the key areas of financial services activity in the economy and the theories and principles related to those areas;
- An understanding of the local and global legal, economic, and social framework within which financial services operates.
- An introduction to the skills to begin to develop as an independent, confident and resilient learner

Knowledge and Understanding	
<ul> <li>A broad knowledge of financial services in general and of its scope, institutional framework, and main areas;</li> </ul>	A1, A2, A5
<ul> <li>Knowledge that is embedded in the main theories, concepts and principles used within financial services;</li> </ul>	A3
Knowledge of the use of data	A4
• An awareness of the evolving nature of knowledge and	A2, A5
understanding	
Practice: Applied knowledge skills & understanding	
<ul> <li>Present and evaluate arguments, information and ideas which are routine to financial services; and</li> </ul>	B1, B3,
• Use a range of approaches to addressing defined problems and	B3, B4, B5
issues within familiar contexts.	B6
<ul> <li>Reflect on personal learning and development</li> </ul>	
Generic/cognitive Skills	

<ul> <li>Use basic and routine skills, techniques, practices and materials associated with financial services; and</li> </ul>	C1, C2, C5
• Practise these in both routine and non-routine contexts.	C3
Communication/numeracy and ICT Skills	
<ul> <li>Use a range of forms of communication effectively and convey complex ideas in a well-structured and coherent form;</li> </ul>	D1-3
<ul> <li>Use standard applications to process and obtain a variety of information; and ability to convey numerical, financial and statistical data;</li> </ul>	D4, D6
<ul> <li>Exercise some initiative and independence in carrying out defined activities; and</li> </ul>	D2
<ul> <li>Take account of own and others' roles and responsibilities in carrying out and evaluating tasks.</li> </ul>	D5
Autonomy, Accountability and Working with Others	
• Exercise some initiative and independence in carrying out defined	
activities at a professional level in a subject/discipline	E1
<ul> <li>Manage limited resources within defined areas of work</li> </ul>	E3
<ul> <li>Take account of own and others' roles and responsibilities when</li> </ul>	
carrying out and evaluating tasks	E1
Work under guidance, with others to acquire an understanding of	
current professional practice	E4

## Level 2 – Opportunities and Responsibilities

Students will enhance their knowledge and expertise in various themes of the programme, including assessments that will encourage their independent thinking and confidence in managing themselves and others. They will be encouraged to consider the role of ethical and socially responsible leadership and its relevance to GCU's Common Good mission. As well as embedding further skills in relation to the Bloomberg Lab, the Financial Technology module will serve to enhance students' technological knowledge and skills. As in Level 1, a framework of co-curricular and extra-curricular activity will continue to be provided. Employer and industry involvement at this level will begin to be more related to module content, and students will be supported with opportunities to develop and enhance their industry networking. This will further foster confidence, real-world learning and an entrepreneurial mindset, as students are encouraged to consider the possibilities for placements, work experience and exchange in Level 3

The academic focus at Level 2 is mainly on application and analysis. The objective is to provide students with:

- A knowledge and understanding of the scope and main areas of financial services and its interactions with related subjects;
- Detailed knowledge of some key financial services areas, including an understanding of a range of the essential theoretical tools, principles and concepts related to those areas;
- An awareness of major issues at the forefront of financial services.
- An awareness of the roles and career, and the professional attitudes required, in the financial services

#### Knowledge and Understanding

A broad knowledge of the scope, defining features, and main A1, A2, A5 areas of financial services together with detailed knowledge in some areas;

• Uno	derstanding of a limited range of core theories and	A3
the	oretical tools, principles and concepts together with	
lim	ited knowledge and understanding of some major current	
issu	ues and specialisms; and	
• An	outline knowledge and understanding of research and	A3, A4
equ	uivalent scholarly processes.	
Practic	e: Applied knowledge, skills an understanding:	
• Uno	dertake critical analysis of ideas, concepts, information and	B1, B2
issu	ues which are within the common understandings of	
fina	ancial services;	
• Use	e a range of approaches to formulate evidence-based	B3, B4
sol	utions to defined problems and issues;	
Crit	ically evaluate own work	B5
Ref	lect on personal learning and development	B6
Generi	c/cognitive skills	
• Use	e a range of routine skills, techniques, practices and	C1, C2, C4, C5
ma	terials associated with accounting, a few of which are	
adv	vanced or complex	
• Car	ry out routine lines of enquiry, development or	C2
inv	estigation into defined problems and issues;	
• Ada	apt routine practices within accepted standards.	C3, C5
Comm	unication, numeracy and ICT Skills	
• Inte	erpret, use and evaluate numerical and non-numerical	D1, D3, D4, D6
dat	a;	
• Exe	rcise autonomy and initiative; and	D2
• Tak	e responsibility for work of self and others	D2, D5
Auton	omy, Accountability and Working with Others	
• Exe	ercise some autonomy and initiative in some activities in a	
sub	oject	E1
• Ma	nage resources within defined areas of work.	E1
• Tak	the lead on planning in familiar or defined contexts.	E3
• Wo	ork, under guidance, with others to acquire an	E3
	derstanding of current professional practice.	E4
	nage, under guidance, ethical and professional issues in	E5, E6
	ordance with current professional and/or ethical codes or	
pra	ctices	

#### Level 3 – Roles and Expectations

Students at Level 3 will be encouraged to enhance their competence in key themes of the programme, including risk, corporate finance and investment, and sustainability, using the Bloomberg Lab as well as other relevant software. Assessments will encourage collaboration and 'real world' analysis and problem solving, as well as offering opportunities to enhance resilience and confidence through teamworking and presentations. Optional modules will enable students to enhance their specialist knowledge in areas such as personal finance, as well as providing the possibility of assessed work experience.

Through the range of modules and learning experiences offered at this Level, students will be encouraged to use the foundation of their learning to date to develop key industry expertise in specific areas relevant to the financial services sector, and to apply that knowledge to 'real world' problems and experiences. They will also be encouraged to reflect on the development of their knowledge and skills and potential career paths and opportunities. The Financial Capability, Skills and Employability module will play an important role in this, but these efforts will again be supported by a framework of co-curricular and extra-curricular activity It is recognised that Direct Entrants to Level 3 will require additional support as they start their studies. Although they will have appropriate underpinning knowledge, they will be provided with additional support through co-operation with the Learning and Development Centre as well as receiving additional support in the Bloomberg Lab to enable them to take full advantage of the Lab's functionality throughout their studies.

The academic focus at Level 3 is on critical analysis and practical application. The objective is to provide students with:

- A broad and comparative knowledge of financial services, its different areas and applications, and its boundaries with other disciplines;
- A detailed knowledge of defined subjects, or a more limited coverage of a specialist area balanced by a wider range of study. In each case, detailed/specialist study will be informed by current developments in the subject;
- A critical understanding of the essential theories, principles and concepts, and practices in financial services and of the ways in which these are developed through the main methods of enquiry in the area;
- An awareness of the provisional nature of knowledge.

## Knowledge and Understanding

Knowledge and Understanding	
A broad and integrated knowledge and understanding of the scope, main	A1, A2,
areas and boundaries of financial services;	A5, A6
• A critical understanding of a selection of the principal theories, principles,	A3, A4,
concepts and terminology of financial services; and	A6
<ul> <li>Knowledge that is detailed and is informed by current developments.</li> </ul>	A2, A6
Practice: Applied knowledge, skills and understanding:	
<ul> <li>Undertake critical analysis, evaluation and synthesis of ideas, concepts, information and issues;</li> </ul>	B1, B2, B5
<ul> <li>Identify and analyse routine problems and issues; and</li> </ul>	B3
<ul> <li>Draw on a range of sources in making judgements.</li> </ul>	B4
<ul> <li>Reflect on personal learning and development</li> </ul>	B6
Generic/cognitive skills:	
<ul> <li>Use a selection of the principal skills, techniques, practices and materials associated with financial services;</li> </ul>	C1-5
<ul> <li>Use a few skills, techniques, practices and materials that are specialised or advanced;</li> </ul>	C2, C3
<ul> <li>Practise routine methods of enquiry and research;</li> </ul>	C3, C4
<ul> <li>Practise in a range of contexts which include a degree of unpredictability.</li> </ul>	C2, C4
Communication/numeracy and ICT Skills	
<ul> <li>Make formal and informal presentations on standard/mainstream topics in financial services to a range of audiences;</li> </ul>	D3
<ul> <li>Practise in ways which take account of own and others' roles and responsibilities;</li> </ul>	D2, D5
<ul> <li>Use a range of IT applications to support and enhance work;</li> </ul>	D6
<ul> <li>Interpret, use and evaluate numerical and graphical data to achieve required outcomes.</li> </ul>	D1-4, D6 D10-12
Autonomy, Accountability and Working with Others	
<ul> <li>Exercise autonomy and initiative in some activities in a subject or discipline</li> </ul>	E1, E3

٠	Practise in ways that show awareness of own and others' roles and	E2
	responsibilities.	

• Seeking guidance where appropriate, manage ethical and professional E4 issues in accordance with current professional/ethical codes of practice.

## Level 4 Identity and Aspiration

This level of study enables the students to deepen their understanding in specific themes relevant to the programme whilst also pursuing other areas that may be relevant to their goals and career aspirations (through the dissertation and options). As well as embedding global perspectives of financial services, it is a culmination of the student journey to becoming independent, confident socially responsible citizens ready to become the next generation of leaders in financial services. There will continue to be co-curricular and extra-curricular activity based upon employer/industry involvement and interaction in modules, providing students with further opportunities to explore, develop and act upon their career aspirations.

The academic focus at Level 4 is mainly on synthesis and evaluation. The objective is to provide students with:

- A systematic, extensive and comparative knowledge and understanding of financial services as a whole and its links to related subjects;
- A detailed knowledge of a few specialisms and developments, some of which are at, or informed by, the forefront of financial services practice;
- A critical understanding of the established theories, principles and concepts, and of a number of advanced and emerging issues at the forefront of financial services;
- A critical understanding of the uncertainty and limits of knowledge and how it is developed, and an ability to deploy established techniques of analysis and enquiry within financial services to empirically test theories, principles and concepts.

Knowledge and Understanding	
Knowledge that covers and integrates most of the principal areas	A1, A2, A5, A6
<ul> <li>A critical understanding of the principal theories</li> </ul>	A3, A6
<ul> <li>Knowledge and understanding of the ways in which financial services are developed and applied</li> </ul>	A3, A4, A6
Practice: Applied Knowledge Skills & Understanding	
<ul> <li>Critically identify, define, conceptualise, and analyse complex problems and issues;</li> </ul>	B1, B2, B5
<ul> <li>Critically review and consolidate knowledge, skills and practices in financial services;</li> </ul>	B1-3
<ul> <li>Demonstrate some originality and creativity in dealing with problems and issues;</li> </ul>	B4
<ul> <li>Make judgements where information is limited or comes from a range of sources.</li> </ul>	B4, B5
<ul> <li>Reflect on personal learning and development</li> </ul>	B6
Generic/cognitive Skills	
<ul> <li>Use a range of the principal skills, practices and materials associated with financial services;</li> </ul>	C1, C2, C5
<ul> <li>Use a few skills, practices and materials which are specialised, advanced, or at the forefront of accounting;</li> </ul>	C2, C3

C1, C2, C4

• Execute a defined project of research and identify and implement relevant outcomes:

<ul> <li>Practise in a range of contexts which include a degree of unpredictability and/or specialism.</li> </ul>	C3
Communication/numeracy and ICT Skills	
<ul> <li>Interpret use and evaluate wide range of data to achieve desired outcomes</li> </ul>	D1-4, D6
<ul> <li>Exercise autonomy and initiative;</li> </ul>	D2, D5
<ul> <li>Behave in ways which show a clear awareness of own and others' roles and responsibilities</li> </ul>	D5
Autonomy, Accountability and Working with Others	
<ul> <li>Exercise broad autonomy and initiative in professional (scholarly) activities.</li> </ul>	E1, E3
<ul> <li>Practise in ways that show awareness of own and others' roles and responsibilities</li> </ul>	E2
<ul> <li>Work with others to bring about change, development and/or new thinking s</li> </ul>	E5, E6
<ul> <li>Manage complex ethical and professional issues in accordance with current professional and/or ethical codes of practice</li> </ul>	E4

### LEARNING OUTCOMES

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas:

#### A: Knowledge and understanding;

- **A1** The national, international and global roles, operations and functions of financial institutions and markets, as well as those working in financial services
- A2 The social and economic environment in which financial institutions operate and the management and governance structures of these organizations, including the UN's Sustainable Development Goals
- **A3** Ability to apply relevant theories, theoretical tools and concepts as a means of understanding behaviour and practices within the financial services industry, both locally and globally
- A4 Ability to interpret financial data including that arising in the context of the firm or household from accounting statements and data generated in financial markets including, where appropriate, the manipulation of data and the use of statistical and financial functions and procedures
- **A5** Understand the factors influencing the investment behaviour and opportunities of private individuals and business entities
- A6 Post-entry choice is structured to enable students to develop critical knowledge of the major theories, theoretical tools, concepts and practices relating to the themes of the programme, as well as developing other areas of related interest. Detailed knowledge and understanding in one or more of these areas will be at the forefront of their choice

#### B: Practice: Applied knowledge, skills and understanding;

- **B1** Critically review, synthesise and develop knowledge in relation to a range of principal theories concepts and tools associated with the financial services industry
- **B2** Critically analyse, synthesise and evaluate quantitative and qualitative data from multiple sources, as well as being able to critically assess the usefulness and limitations of such data
- **B3** Systematically manage research and problem-solving tasks in a range of contexts

- **B4** Demonstrate originality, insight and innovativeness in tackling and solving problems
- **B5** Reflect upon and critically evaluate the work undertaken by themselves and others
- **B6** Reflect on personal learning and development

## C: Generic cognitive skills;

- **C1** Interpret and communicate, by oral and written means, in a range of different formats, quantitative and qualitative data, including financial statements and accounts as well as statistical data
- **C2** Apply problem-solving skills to practical problems and scenarios, where appropriate adapting academic knowledge and skills to meet the practical needs of a business environment
- **C3** Develop awareness of professional behaviour and application of skills in the areas of personal finance, corporate finance and investment, banking and international finance, and risk as they relate to practice in the financial services industry
- **C4** Systematically manage research and problem-solve tasks in a range of contexts, including development of group working and leadership skills in a range of contexts
- C5 Career- development through social and networking skills
- **C6** Deal with complex issues and make responsible and informed judgements in situations in the absence of complete or consistent data/information

## D: Communication, numeracy and ICT skills

- **D1** Intellectual skills including critical thinking, self-reflection, creative and ethical problemsolving and decision-making
- **D2** Time management; organising and planning work by way of self-management and ability to work independently; planning, monitoring, reviewing and evaluating own learning and development
- **D3** Presentation and communication skills in variety of formats and contexts, including selfpresentation and marketing skills
- **D4** Numeracy skills, including ability to convey and express numerical, financial and statistical data
- **D5** Inter-personal skills and inter-cultural awareness, including listening, questioning, influencing and persuading, providing feedback, and doing so in a way that exhibits sensitivity to other cultures and perspectives
- **D6** Use of different IT packages and programmes as a means of retrieving, analysing and synthesising numerical and non-numerical data

## E: Autonomy, accountability and working with others.

- **E1** Exercising initiative and independence in carrying out defined activities at a professional level in a subject as well as taking into account own and others' roles and responsibilities when carrying out and evaluating tasks
- **E2** Seeking guidance as appropriate, in managing ethical and professional issues in accordance with current codes of practice
- **E3** Taking a lead on planning in familiar or defined contexts and managing resources within defined areas of work
- **E4** Working under guidance with others to acquire an understanding of current professional practice, and managing ethical and professional issues
- **E5** Working with others to bring about change, development and/or new thinking
- **E6** Exercising autonomy and initiative in scholarly activities

### LEARNING AND TEACHING METHODS

The programme provides a variety of learning and teaching methods. Programme and Module specific guidance will provide detail of the learning and teaching methods specific to each module.

Across the programme the learning and teaching methods and approaches may include the following:

- Lectures
- Seminars
- Practical classes
- Placements
- Simulation experiences
- Groupwork
- Flipped classroom approaches
- Online learning

The above approaches may be delivered either in person or online as appropriate and determined at module level by the Module Leader.

## ASSESSMENT METHODS

The programme provides a variety of formative and summative assessment methods. Programme and Module specific guidance will provide detail of the assessment methods specific to each module.

Across the programme the assessment methods may include the following:

- Written coursework (essays, reports, case studies, dissertation, literature review)
- Oral coursework (presentations, structured conversations)
- Practical Assessment (Placement, VIVA, Laboratory work)
- Group work
- Blogs and Wikis
- Portfolio Presentations
- Formal Examinations and Class Tests

The above assessments may be delivered either in person and online as appropriate and determined at module level by the Module Leader.

## ENTRY REQUIREMENTS

Specific entry requirements for this programme can be found on the prospectus and study pages on the GCU website at these locations:

https://www.gcu.ac.uk/study/courses/undergraduate-finance-investment-and-risk-glasgow https://www.gcu.ac.uk/study/courses/undergraduate-finance,-investment-and-risk-pathwaymultiple-locations

All students entering the programme are required to adhere to the GCU Code of Student Conduct.

The following	modules are delivered as part of this programme:						
Module Code	Module Title	Core or Optional	SCQF Level	Credit Size	Coursework (may include class test %	Exam %	Practical (incl. presentation) %
M1N230354	Global Challenges for Business and Society	Core – A	7	20	80	20	
M1L130452	Fundamentals of Economics	Core – A	7	20	50	50	
M2N330359	Fundamentals of Financial Management for Decision Makers	Core - A	8	20	40	60

Bachelor of Arts in Finance, Investment and Risk - achieved upon successful completion of 360 credits

Bachelor of Arts with Honours in Finance, Investment and Risk - achieved upon successful completion of 480 credits

#### ASSESSMENT REGULATIONS

Students should expect to complete their programme of study under the GCU Assessment Regulations that were in place at the commencement of their studies on that programme, unless proposed changes to University Regulations are advantageous to students. These can be found at: <a href="https://www.gcu.ac.uk/aboutgcu/supportservices/qualityassuranceandenhancement/regulationsandpolicies">www.gcu.ac.uk/aboutgcu/supportservices/qualityassuranceandenhancement/regulationsandpolicies</a>

<sup>&</sup>lt;sup>3</sup> Please refer to the <u>GCU Qualifications Framework</u> for the minimum credits required for each level of award and the Programme Handbook for requirements on any specified or prohibited module combinations for each award.

	OL (to be completed in line with AQPP processes) he PSP must be recorded below by the programme team to ensure a	ccuracy of the programme of stud	y being offered.
Version Number	Changes/Updates	Date Changes/Updates made	Date Effective From

## **Curriculum Map**

The curriculum map links the modules listed in the Programme Structure to the Learning Outcomes

This map provides both a design aid to help academic staff identify where the programme outcomes are being developed and assessed within the course. It also provides a checklist for quality assurance purposes and could be used in approval, accreditation and external examining processes. This also helps students monitor their own learning, and their personal and professional development as the course progresses.
